

POINT OF LIGHT

My daughter felt that God was asking her to speak with someone in a specific spot but every time she went by no one was there. One day she was going by and there was a man sitting in the spot God told her about. She went over and shared the message God told her to tell him... All about how he wasn't alone God sees him and loves him. The man began to cry really cry and responded by saying that he has been feeling so lost and alone. He had a relationship with God that he lost some how and he thanked her over and over for sharing. He admired her courage. God is so so Good!! I am continually in awe of our creator. He chooses to use us to reach others. He chooses to allow us to let His light shine!

POINT OF LIGHT

Helped a family from overseas move in their daughter for university. Brought them around to the market and to Walmart etc. to help them get errands done. Though the daughter is a Christian the parents are not and through these interactions, they even came out to church with us.

POINT OF LIGHT

There is a woman I met last year, she was pregnant at the time. We were stuck in unfortunate circumstances and we didn't really connect. Earlier this year we reconnected and she had her daughter by this point. We were chatting one day and I discovered that she was in need of clothing for her daughter and she was strapped for money. It just so happened my daughter had out grown A LOT. So I offered her all my daughters old things; clothing, toys etc. And I get to see her daughter in the same outfits my daughter was in and it truly warms my heart!

THE PEOPLE OF WPA ARE THEOLOGICALLY, MISSIONALLY AND SPIRITUALLY VITAL.

JENNIFER
Tutoring

Dozens of students have benefitted from free tutoring offered by our church, many of whom have gone from struggling math students to very competent in the discipline. One student in particular, named Jennifer, went from being disinterested in the subject to it becoming her strongest discipline, consistently earning highest marks in math year over year. She is now studying nanotechnology engineering at U of W.

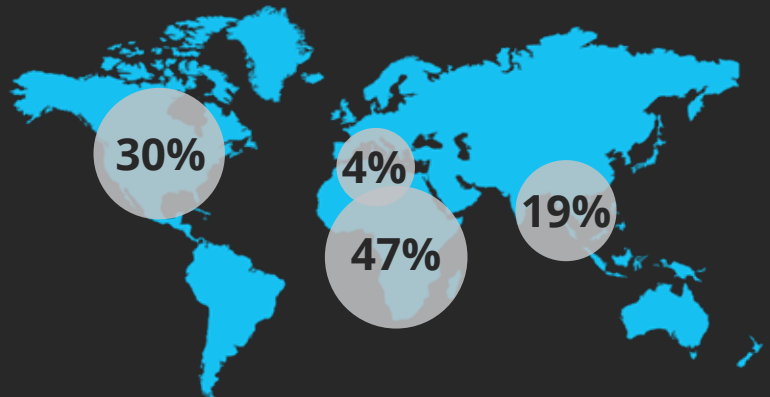

1000 POINTS OF LIGHT

1000 Points of Light is an intentional initiative created to help us shift our perspective and open our eyes to the everyday opportunities that God sets before each and every one of us.
